Over 800 facilities
efited to date.

the purchase and
on of this equipment,
s a need to track
items through the IP
lth facility where they
ered.

Management System
is a tracking system
top of DHIS2 data
at was designed and

Edward Bichetero giving and overview on the ICT procurement and distribution in PE
regions and a cross section of participants at the launch.

developed by METS in consultation
with CDC and IPs to track and manage
all the procured and distributed IT
assets. The system captures data on

the hardware procured, allo
distributed and tracks ma
and custody status of the e
up until the final consumer.
