

## MakSPH-METS hosts CDC Kenya on a RASS Benchmarking Visit to Uganda

CDC Kenya (left) spends several days at MakSPH-METS for an RASS benchmarking visit to Uganda.

MakSPH-METS recently hosted a group of 12 people from the Centers for Disease Control and Prevention (CDC) Kenya on a RASS benchmarking visit to Uganda. The group spent several days at MakSPH-METS, observing and learning from our RASS implementation. The visit was led by Dr. [Name], Director of RASS at MakSPH-METS, and included several other staff members. The group was accompanied by Dr. [Name], Director of RASS at MakSPH-METS, and several other staff members. The visit was a successful one, and we look forward to continuing our collaboration with CDC Kenya in the future.

During the visit, the group observed our RASS implementation, including our RASS training, RASS data management, and RASS reporting. The group also participated in several RASS training sessions, and we provided them with a copy of our RASS implementation manual. The group was very impressed with our RASS implementation, and we look forward to continuing our collaboration with CDC Kenya in the future.

Dr. [Name], Director of RASS at MakSPH-METS, expressed his appreciation for the group's visit, and he thanked them for their interest in our RASS implementation. He also expressed his hope that the group would be able to share their experiences with their colleagues in Kenya. The group's visit was a very successful one, and we look forward to continuing our collaboration with CDC Kenya in the future.
