

MakSPH-METS hosts CDC Kenya on a RASS Benchmarking Visit to Uganda

CDC Kenya (left) spends several days at MakSPH-METS for an RASS benchmarking visit to Uganda.

MakSPH-METS recently hosted a group of 12 people from the Centers for Disease Control and Prevention (CDC) Kenya on a RASS benchmarking visit to Uganda. The group, led by Dr. John N. Njiru, Director of the Center for Health Services Research and Promotion, spent several days at MakSPH-METS, including a tour of the facility, a meeting with the MakSPH-METS leadership, and a meeting with the CDC Kenya leadership.

The visit was part of a broader effort to strengthen the relationship between MakSPH-METS and CDC Kenya, and to explore opportunities for collaboration in the areas of research, training, and service delivery. The group also met with the MakSPH-METS leadership to discuss the center's vision and mission, and to identify areas for future collaboration.

Dr. Njiru expressed his appreciation for the CDC Kenya leadership's interest in MakSPH-METS, and his commitment to providing high-quality, evidence-based care to the community. He also expressed his hope that the visit would lead to a number of collaborative opportunities between MakSPH-METS and CDC Kenya.
